Agenda

Completing requirements for project review and choosing project

Notes

Decisions

We chose to do the markdown project.
We discussed and choose our tech stack (Spring Boot, SQLite, Json).

Actions

Made first commit with starter files (README, gitignore, meeting-minutes, multi-project build)
Set up CI/CD on remote machine.
Discussed requirements of project, choice on tech stack, discussed risks.
Organized and interviewed for personas.
Setup basic Gitlab milestones and labels.
